

Travellers' Guide to Interstate Quarantine.

Travelling within Australia?

Please use this simple guide to find out what you can and can't take across State and quarantine borders.

Warning – penalties apply.

***Quarantine* Domestic**

Have a great holiday & look after Australia ...

Plant pests and diseases can spread from one part of Australia to another through the movement of fruit, vegetables, plants, flowers, plant products and soil.

Restrictions apply to each State and Territory for the movement of these products to protect Australia's valuable plant industries from a range of pests and diseases and to maintain access to valuable local and overseas markets. These restrictions operate under State and Territory legislation.

The introduction of a pest or disease into a production area can result in expensive controls being implemented and loss of markets, which can cost industries and the community millions of dollars.

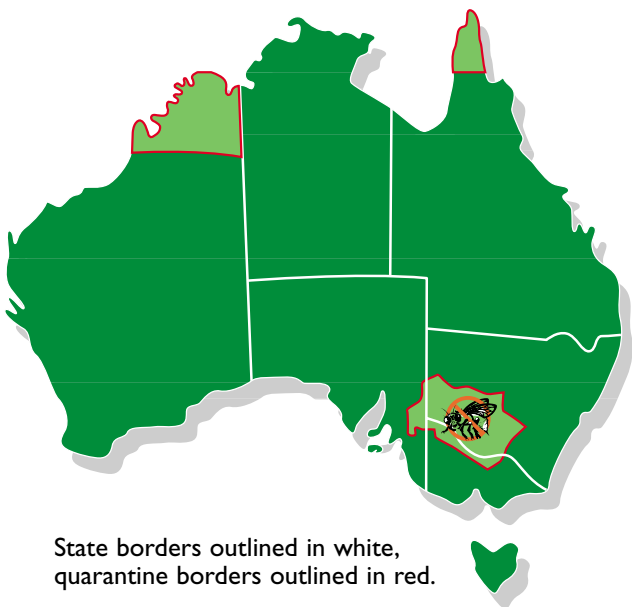

This quick reference guide can help you as you travel, but remember, requirements may change. To stay up to date or for further information, please contact your relevant interstate quarantine authorities through Quarantine Domestic on freecall 1800 084 881 during business hours Monday to Friday.

Please note – this brochure is a general guide for interstate travellers. Commercial importers and exporters must consult with State authorities for full information.

Contents

Map of State & quarantine borders	4
Key	5
New South Wales (including ACT)	6
Northern Territory	7
Queensland	8
South Australia	9
Tasmania	10
