

EXPORT ADVISORY NOTICE – 2007-15			9 August 2007	
Title:	Reporting requirements for voyages with more than one exporter.			
Species:	Livestock by sea			
Country:	All	File No.	2007/00655	
Relevant to:	Licensed exporters AQIS Live Animal Exports Officers AQIS accredited veterinarians			

Purpose

To clarify with exporters and AQIS accredited veterinarians of the voyage reporting requirements

Background

The following reporting requirements are included in the Australian Standards for the Export of Livestock:

ASEL 5.12	For journeys greater or equal to ten (10) days, an accredited stock person must provide daily reports on the health and welfare of the livestock to the relevant Australian Government agency, commencing on day one (1) of the voyage. The report must include the information outlined in Appendix 5.1.
ASEL 5.13	Regardless of the journey duration, within five (5) days of completion of discharge at the final port of discharge, an accredited stock person must provide an end-of-voyage report on the health and welfare of the livestock to the relevant Australian Government agency. The report must include the information outlined in Appendix 5.2. Where an accredited veterinarian is on board, the veterinarian rather than the stock person must provide the end-of-voyage report.

Instructions

For vessels which have consignments (LNCs) of livestock from more than one exporter, the person writing the long haul daily report (AAV or stockman) must supply information in accordance with Appendix 5.1 for each consignment (each LNC) on the vessel.

For long and short haul end of voyage reports which have consignments of livestock from multiple exporters, the person writing the report must supply information in accordance with Appendix 5.2 for each consignment (each LNC) on the vessel.

Information that is common for the whole vessel on an end of voyage report can be presented once only. So one report can include information on more than one LNC so long as the information specified in Appendix 5.2 is provided for each LNC in that report.
