If the RFP contains imported product please include a tick in the “Imported Product Flag” box and advise in the email the nature of the imported dairy ingredient including percentage in the product and country of origin.</p> <p>Exporters of infant formula must ensure that the infant formula has been tested at a NATA laboratory for <i>Enterobacter sakazakii</i> and must include the exporter declaration: “This product is covered by NATA certificate for <i>Enterobacter sakazakii</i> (number if applicable) dated (insert date).”</p>
<ul style="list-style-type: none"> <li>• Specific country requirements</li> </ul>	Nil
<b>Substantiation requirements</b>	Declaration of Compliance indicating eligibility for Singapore Transfer documentation
<b>Transit Certification Requirements</b>	Milk and milk products transiting the European Union or the United States may require transit documentation. These certificates are available as additional certificates through the EXDOC system. If the product is transiting the United States, standard certification is required and the exporter should contact the DRU for advice on how this certification may be issued. If the product is transiting a European Union member state, see the particular European Union member state regarding the certificate template to select.
