<b>Date of issue</b>	16/9/02
<b>EXDOC country code</b>	VE
<b>Additional Requirements and Information</b>	
<b>Establishment listing requirements</b>	Not applicable
<b>Exporter Declaration requirements</b> <ul style="list-style-type: none"> <li>• <b>For exports of all prescribed edible product</b></li> </ul> <ul style="list-style-type: none"> <li>• <b>Specific country requirements</b></li> </ul>	<p>Exporters must provide a declaration that all information in the permit is true and complete and that they are in possession of a declaration of compliance that:</p> <p>(i) applies to the milk and milk products; and</p> <p>(ii) complies with the requirements of clause 6 of Schedule 9 of the Export Control (Milk and Milk Products) Orders 2005.</p> <p>Nil</p>
<b>Substantiation requirements</b>	Declaration of Compliance Transfer documentation
<b>Transit Certification Requirements</b>	Milk and milk products transiting the European Union or the United States may require transit documentation. For product transiting the European Union via seafreight a DS054 certificate is provided and for product transiting the European Union via airfreight a DA054 certificate is provided. These certificates are available as additional certificates through the EXDOC system and are required to be signed by AQIS officers in a different colour ink to that of the printing of the certificate. If the product is transiting the United States standard certification is required and the exporter should contact the DRU for advice on how this certification may be issued.
<b>Certification Requirements</b>	
<b>1. Edible Product</b>	
<b>EXDOC certification available for milk and milk products for human consumption</b>	ZD035 DAIRY HEALTH CERTIFICATE
<b>Default endorsement</b>	<p>2021 - DAIRY - VENZEUELA - Diseases and radioactivity</p> <p>1. Routine fallout monitoring has been undertaken in all Australian states since the mid-1950s. Following the cessation of French atmospheric nuclear weapons testing in the Pacific in 1974, fallout deposits decreased rapidly until present, where levels are at or below the minimum detectable.</p> <p>2. Monitoring since Chernobyl has shown no increase in fallout deposits and indications are that all fallout has now occurred and there will be no change.</p> <p>3. Extensive testing</p>

	<p>since the Chernobyl accident of all agricultural products (including the dairy products listed above) exported from Australia confirms that the radioactivity levels are negligible and therefore significantly less than 50 Becquerels per kilogram measured as Caesium 134 and Caesium 137.</p> <p>Animals from which these products were taken were free from clinical diseases caused by the agents listed in the Office International des Epizooties List A for the species concerned, and live in an area free of these diseases. I further certify that Foot and Mouth Disease, Rinderpest and Bovine Spongiform Encephalopathy do not exist in Australia.</p>
<b>Optional endorsements available through EXDOC</b>	Nil
<b>Additional Certificate Options available through EXDOC</b>	<p>ZX01 Dioxin certificate</p> <p>DS054 Animal Health Certificate for milk and milk based products (1), for transit (2) in the European Community – sea freight</p> <p>DA054 Animal Health Certificate for milk and milk based products (1), for transit (2) in the European Community – air freight</p>
